Types of Inspections

Upon notification from the permit holder or his agent, the building official shall make or cause to be made any necessary inspections and shall either approve that portion of the construction as completed or shall notify the permit holder or his agent wherein the same fails to comply with this code. Plans and specifications are to be used as a guide, but the written code text shall prevail.

1. **Footing inspection.** To be made after the trenches are excavated, all grade stakes are installed, all reinforcing steel and supports are in place and appropriately tied, all necessary forms are in place and braced and before any concrete is placed.
2. **Under slab inspection (habitable spaced).** To be made after all forms have been placed, all electrical, plumbing and/or heating and air conditioning facilities, all crushed stone, a vapor retarder, all reinforcing steel with supports and tied and/or all welded wire fabric is installed, when required, but before any concrete is placed.
Exception: Inspection is not required for driveway slabs, garage slabs, carport slabs, patio slabs, walks, etc., which are considered as non-habitable spaces.
3. **Foundation inspection.** To be made after all foundation supports are installed. This Inspection is to check foundation supports, crawl space leveling, ground clearances, and positive drainage, where required.
4. **Rough-in inspection.** To be made when all building framing and parts of the electrical, plumbing, heating/ventilation, or cooling system that will be hidden from view in the finished building have been placed but before any wall, ceiling finish or building insulation is installed.
5. **Building framing.** To be made after the roof, wall, ceiling and floor framing is complete with appropriate blocking, bracing, and fire stopping in place. The following items should be in place and visible for inspection:
 1. Pipes
 2. Chimneys and vents
 3. Flashing for roofs, chimneys and wall openings
 4. Insulation baffles
 5. All lintels required to be bolted to the framing for support shall not be covered by any exterior or interior wall or ceiling finish material before approval. Work may continue without approval for lintels, which are bolted and supported on masonry or concrete.
6. **Insulation inspection.** To be made after an approved building framing and rough-in inspection, with all insulation and vapor retarders are in place but before any wall or ceiling covering is applied.
7. **Other inspections.** In addition to the called inspections above the inspection department may make or require any other inspections to ascertain compliance with this code and other laws enforced by the inspection department.

A new building shall not be occupied, or a change made in the occupancy, nature, or use of a building or part of a building until after the inspection department has issued a Certificate of Occupancy. Said certificate shall not be issued until all required building and service systems shall have been inspected for compliance with this code and other applicable laws and ordinances and released by the inspection department.
